

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	LTVIP2026TMIDS85814
Project Name	Explore with AI: Custom Itineraries for Your Next Journey
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

Many users face difficulty in planning their travel because they do not know where to go or what time to go to the airport. There is no one to help them with the process. We need a system that can help them plan their travel. We need a system that can help them plan their travel. We need a system that can help them plan their travel.

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm
Write down any ideas that come to mind that address your problem statement.

10 minutes

Person 1

1. Allow users to download or save generated itinerary

2. Display itinerary in clear, organized day-wise format

3. Create input fields for destination, number of days, and preferences using Streamlit

Person 2

4. Add hotel, food, and transport suggestions (future feature)

5. Display itinerary in clear, organized day-wise format

6. Allow users to download or save generated itinerary

Person 3

7. Display itinerary in clear, organized day-wise format

8. Create input fields for destination, number of days, and preferences using Streamlit

9. Add hotel, food, and transport suggestions (future feature)

Person 4

10. Display itinerary in clear, organized day-wise format

11. Create input fields for destination, number of days, and preferences using Streamlit

12. Add hotel, food, and transport suggestions (future feature)

Person 5

13. Display itinerary in clear, organized day-wise format

14. Create input fields for destination, number of days, and preferences using Streamlit

15. Add hotel, food, and transport suggestions (future feature)

Person 6

16. Display itinerary in clear, organized day-wise format

17. Create input fields for destination, number of days, and preferences using Streamlit

18. Add hotel, food, and transport suggestions (future feature)

Person 7

19. Display itinerary in clear, organized day-wise format

20. Create input fields for destination, number of days, and preferences using Streamlit

21. Add hotel, food, and transport suggestions (future feature)

Person 8

22. Display itinerary in clear, organized day-wise format

23. Create input fields for destination, number of days, and preferences using Streamlit

24. Add hotel, food, and transport suggestions (future feature)

Person 1

1. Allow users to download or save generated itinerary

2. Display itinerary in clear, organized day-wise format

3. Create input fields for destination, number of days, and preferences using Streamlit

Person 2

4. Add hotel, food, and transport suggestions (future feature)

5. Display itinerary in clear, organized day-wise format

6. Allow users to download or save generated itinerary

Person 3

7. Display itinerary in clear, organized day-wise format

8. Create input fields for destination, number of days, and preferences using Streamlit

9. Add hotel, food, and transport suggestions (future feature)

Person 4

10. Display itinerary in clear, organized day-wise format

11. Create input fields for destination, number of days, and preferences using Streamlit

12. Add hotel, food, and transport suggestions (future feature)

Person 5

13. Display itinerary in clear, organized day-wise format

14. Create input fields for destination, number of days, and preferences using Streamlit

15. Add hotel, food, and transport suggestions (future feature)

Person 6

16. Display itinerary in clear, organized day-wise format

17. Create input fields for destination, number of days, and preferences using Streamlit

18. Add hotel, food, and transport suggestions (future feature)

Person 7

19. Display itinerary in clear, organized day-wise format

20. Create input fields for destination, number of days, and preferences using Streamlit

21. Add hotel, food, and transport suggestions (future feature)

Person 8

22. Display itinerary in clear, organized day-wise format

23. Create input fields for destination, number of days, and preferences using Streamlit

24. Add hotel, food, and transport suggestions (future feature)

3

Group ideas
Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller subgroups.

20 minutes

The team decides to develop Travel Itinerary Generator, an AI-powered system that automatically generates travel itineraries based on user input such as destination and number of days. The system will use Gemini/OpenAI API to create accurate, day-wise travel plans. A simple Streamlit interface will allow users to easily enter their travel details and view the generated itinerary. This idea was selected because it saves time, reduces planning effort, and improves the overall travel planning experience.

Step-3: Idea Prioritization

4

Prioritize
Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Importance

If each of these ideas were just done without any difficulty or cost, which would have the most positive impact?

Feasibility

Regardless of their importance, which ideas are more feasible than others? (Cost, time, effort, complexity, etc.)

Allow users to download or save generated itinerary

Display itinerary in clear, organized day-wise format

Create input fields for destination, number of days, and preferences using Streamlit

Display itinerary in clear, organized day-wise format

Add hotel, food, and transport suggestions (future feature)
